Subject: Application for Web Developer Intern Position (April - June 2025)

Dear Sir or Madam,

Ingérop is a major engineering company recognized for its expertise in digital transformation and innovative projects. I am particularly interested in your commitment to designing sustainable and digital solutions for complex projects, which strongly resonates with my academic background and professional ambitions.

As a second-year Computer Science student at the University Institute of Technology in Saint-Dié-des-Vosges, I have developed strong skills in programming (Java, Python, SQL), web development (HTML, CSS, JavaScript), and database design. I also worked on projects such as a Space Invaders clone in Java and a 2D platformer game in Unity. My previous experience as an apprentice technician at Norske Skog allowed me to strengthen my teamwork, problem-solving abilities, and adaptability.

I am convinced that my technical knowledge and motivation will allow me to contribute effectively to your innovative projects, while benefiting from the expertise of your teams. I would be glad to put my creativity and problem-solving skills at the service of Ingérop, and I am eager to learn more about your digital initiatives.

I would welcome the opportunity to further discuss my application in an interview.
Thank you for your time and consideration.

Sincerely,

Timothé Belcour
